

STEPWISE

Simulation, Training & Evaluation
Platform for the Protection of
croWded public Spaces

What? Practitioner Workshop

*When? Wednesday,
16 January 2019*

*Where? Rue Washington, 40 –
1050 – Brussels (BELGIUM)*

*When? 8:30 – 14:30
(agenda to follow)*

With enthusiasm about the start of the STEPWISE project, we would like to invite you to our **First Practitioner Workshop**.

STEPWISE is an EU-funded project focused on the **protection of public spaces and 'soft targets'**, such as public squares, open gathering areas, public events, transportation infrastructures, and other urban areas vulnerable to attacks. Using STEPWISE, security professionals will be able to visualise and assess vulnerabilities, various threat scenarios and situations. The project will deliver an **innovative platform** to support the cooperation, coordination and cross-sectoral preparedness of **Law Enforcement Agencies and their partners** (public and private) involved in the design and protection of public spaces.

The success of our project depends on the involvement of end users. This interactive workshop is designed to get feedbacks to ensure that the STEPWISE platform is useful for security professionals in various domains. We are eager to hear about your current practices related to the protection of buildings and public spaces, and to ask for your input on system functionalities and uses.

The European Organisation for Security is organizing this event. To **RSVP**, or for questions or additional information, please contact registration@eos-eu.com. We hope to hear back from you regarding your availability by **Monday, 7 January 2019**.

We look forward to seeing you in Brussels!

Best regards,

The STEPWISE consortium
